

Questionnaire Attachment

Below are the questionnaires administered before and after the experiment in the “Social Interaction Experience” study. Participants will respond using a slider interface, with each scale anchored by the extremes shown in brackets.

Pre and Post-Experiment Survey

Welcome to Phase 1. To begin, we will ask you a few brief questions about your current emotional state. *(Note: The slider handle will appear after your first click on the scale.)*

- How much enjoyment do you feel at the moment?
(No enjoyment at all – Extremely much enjoyment)
- How stressed do you feel at the moment??
(Not at all stressed – Extremely stressed)
- How bored do you feel at the moment??
(Not at all bored – Extremely bored)
- How anxious do you feel at the moment??
(Not at all anxious – Extremely anxious)
- How aroused do you feel at the moment??
(Not at all aroused – Extremely aroused)

Post-Experiment Survey

You’ve reached Phase 4, the final part of the study. Please take a moment to reflect on your experience during the chatting task and respond to the following statements *(Note: The slider handle will appear after your first click on the scale.)*
